Claims Rejection Under 35 USC - 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over **Nagano** (5,469,299).

Nagano discloses objective lens system comprises a lens units being made of an optical material which has, a thickness at least 5 mm, and an internal transmittance of at least 50% for a ray having a wavelength of 300 nm. (see abstract and the related disclosure).

Nagano does not disclose explicit state that the thickness of the lens is 10 mm.

It would have been obvious, therefore, at the time the invention was made to a person having skill in the art to make the thickness of the lens of Nagano is 10 mm because Nagano suggested that the thickness of the lens is at least 5 mm.
